# 01. Tips

---

1. The water pump has a built-in intelligent indicator light. There are 3 modes that help you easily check the water level of the drinking fountain.
    - a) The blue light is always on to indicate the normal working mode;
    - b) When the blue light and the red light flash alternately and the water cannot be discharged normally, it means that the water level in the drinking fountain is too low and needs to be replenished in time;
    - c) The red light is always on, indicating that the interior is in a state of water shortage. Please add water in time to avoid dry burning.
  2. Please allow pets to adapt to the drinking fountain, some pets may take a few days or longer to use it;
  3. Please use the drinking fountain indoors and keep it horizontal;
  4. Do not let pets bite the wires or destroy the equipment in case of leakage;
  5. It is recommended to replace the activated carbon filter 2-4 weeks. When multiple pets use the water fountain or there is a lot of pet saliva, the activated carbon filter should be replaced more frequently;
  6. In order not to affect the operation of the pump motor by residual sediment, it is recommended to increase the cleaning frequency of the pump; use bottled water; reduce or eliminate the use of "hard water";
  7. Adding ice cubes to the sink to get fresh cold running water in summer;
  8. The water pump shall not be placed in water with a temperature higher than 35°C;
  9. When using, the water volume should not exceed the marked Max line;
-

## 02. Product parameters

---

Product Name: Stainless Steel Pet Water Fountain

Rated Power: 1W

Power Supply: DC 5V, 130mA

Qmax: 130L/H

Certification: CE、IPX8、REACH

Hmax: 50cm

Wire Length: 1.5m

Capacity: 84oz / 2.5L

Color: Silver

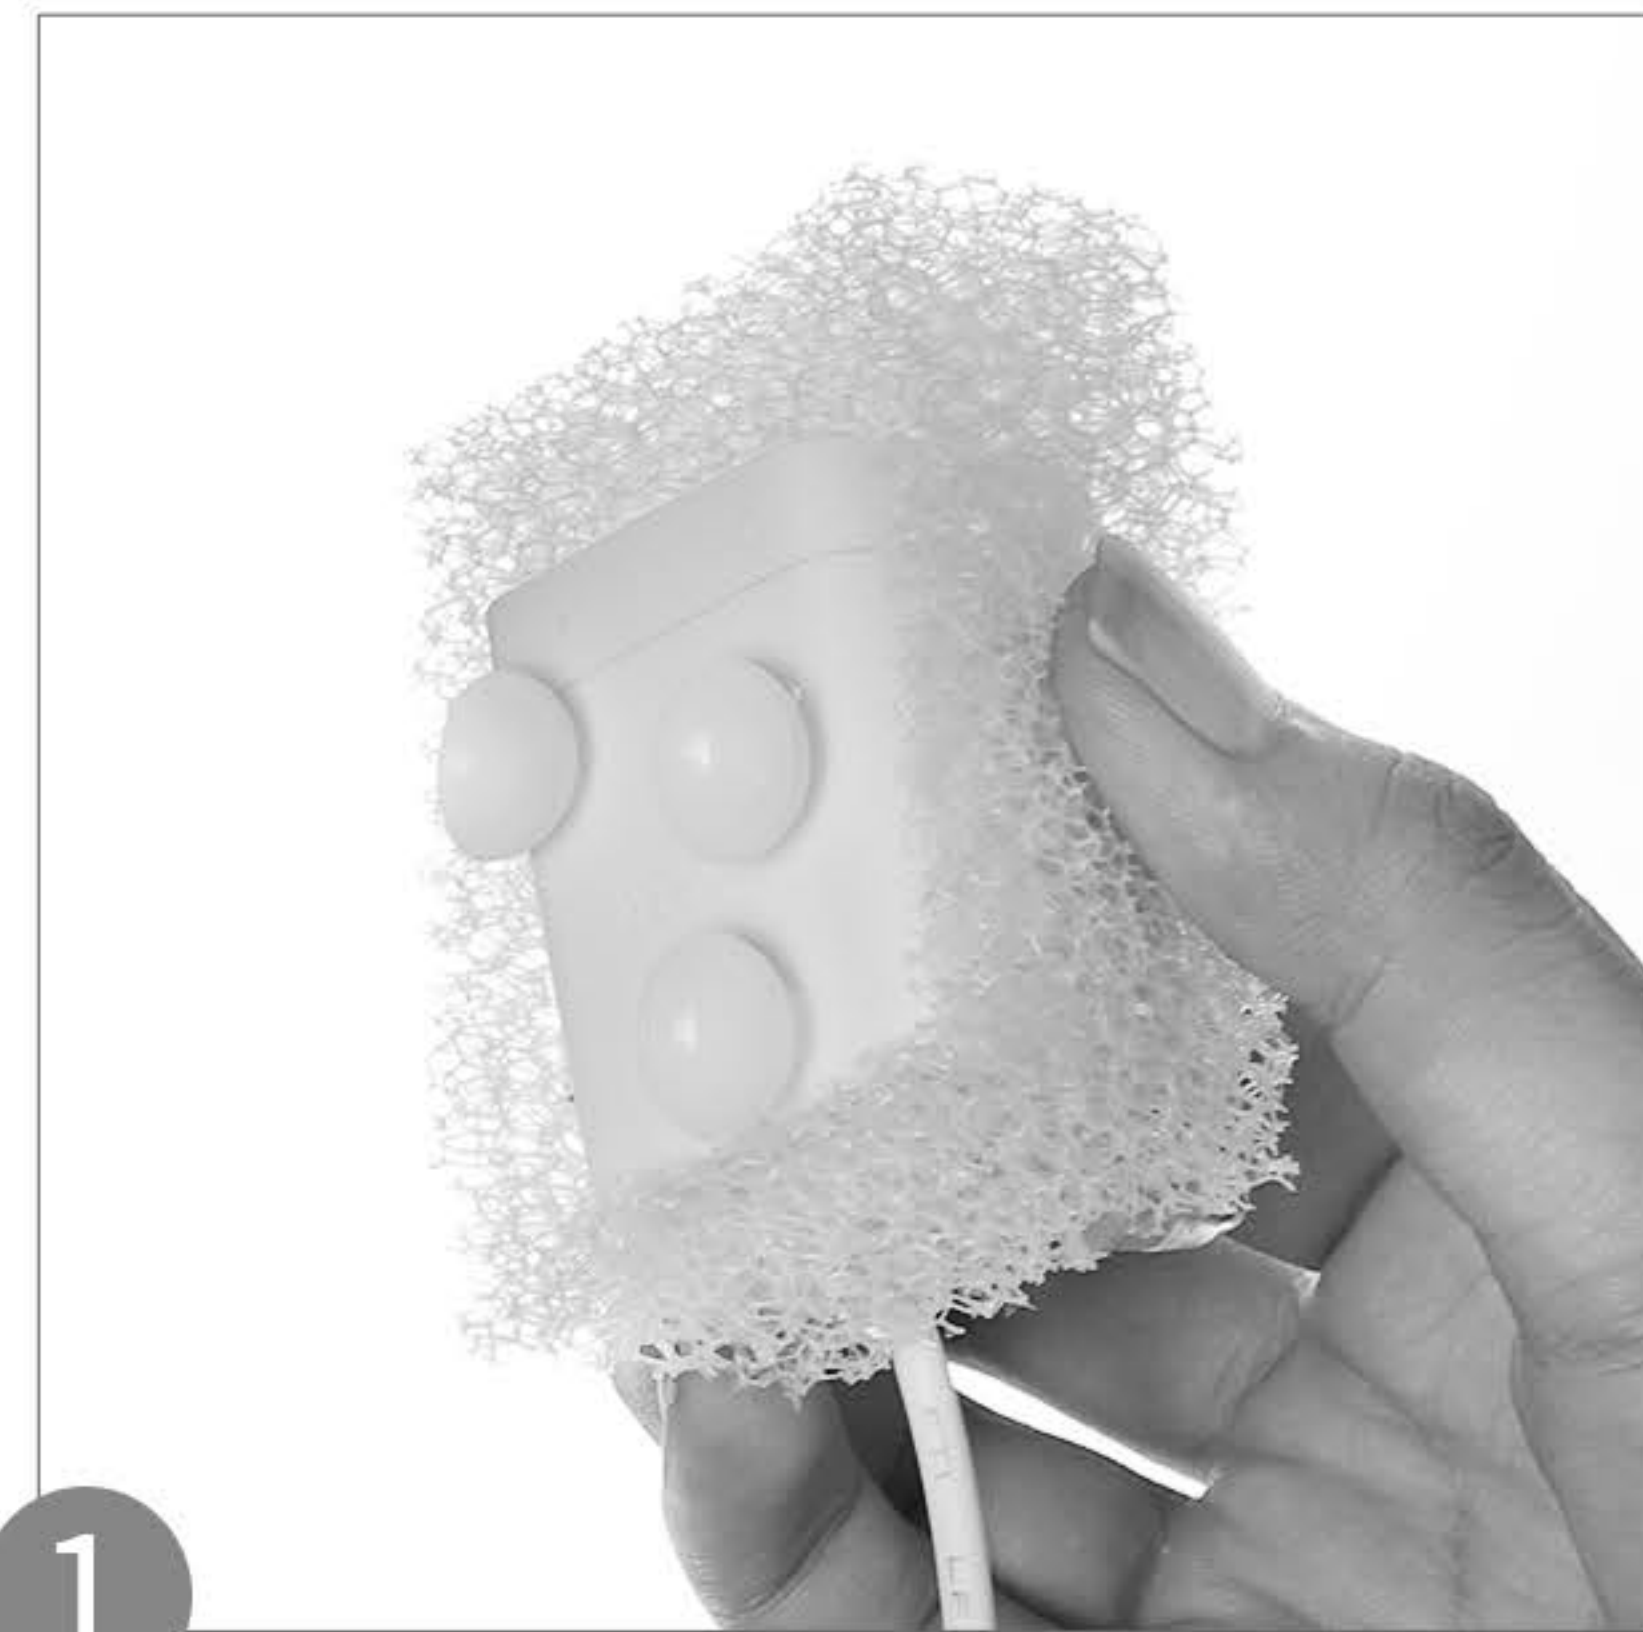

Material: 18/8 Stainless Steel

Accessories: Pet Water Fountain Base x1, USB Cable With Water Pump x1, Water Tray x1  
Pump Brush x1, Pump Filter x1, Sprinkler x1, Fountain Filter x1, Filter Mounting Tray x1  
Water Pump Conduit x2

★ The drinking fountain is only used indoor, and the maximum operating environment of the water pump cannot exceed 35°C

---

## 03. Installation Method

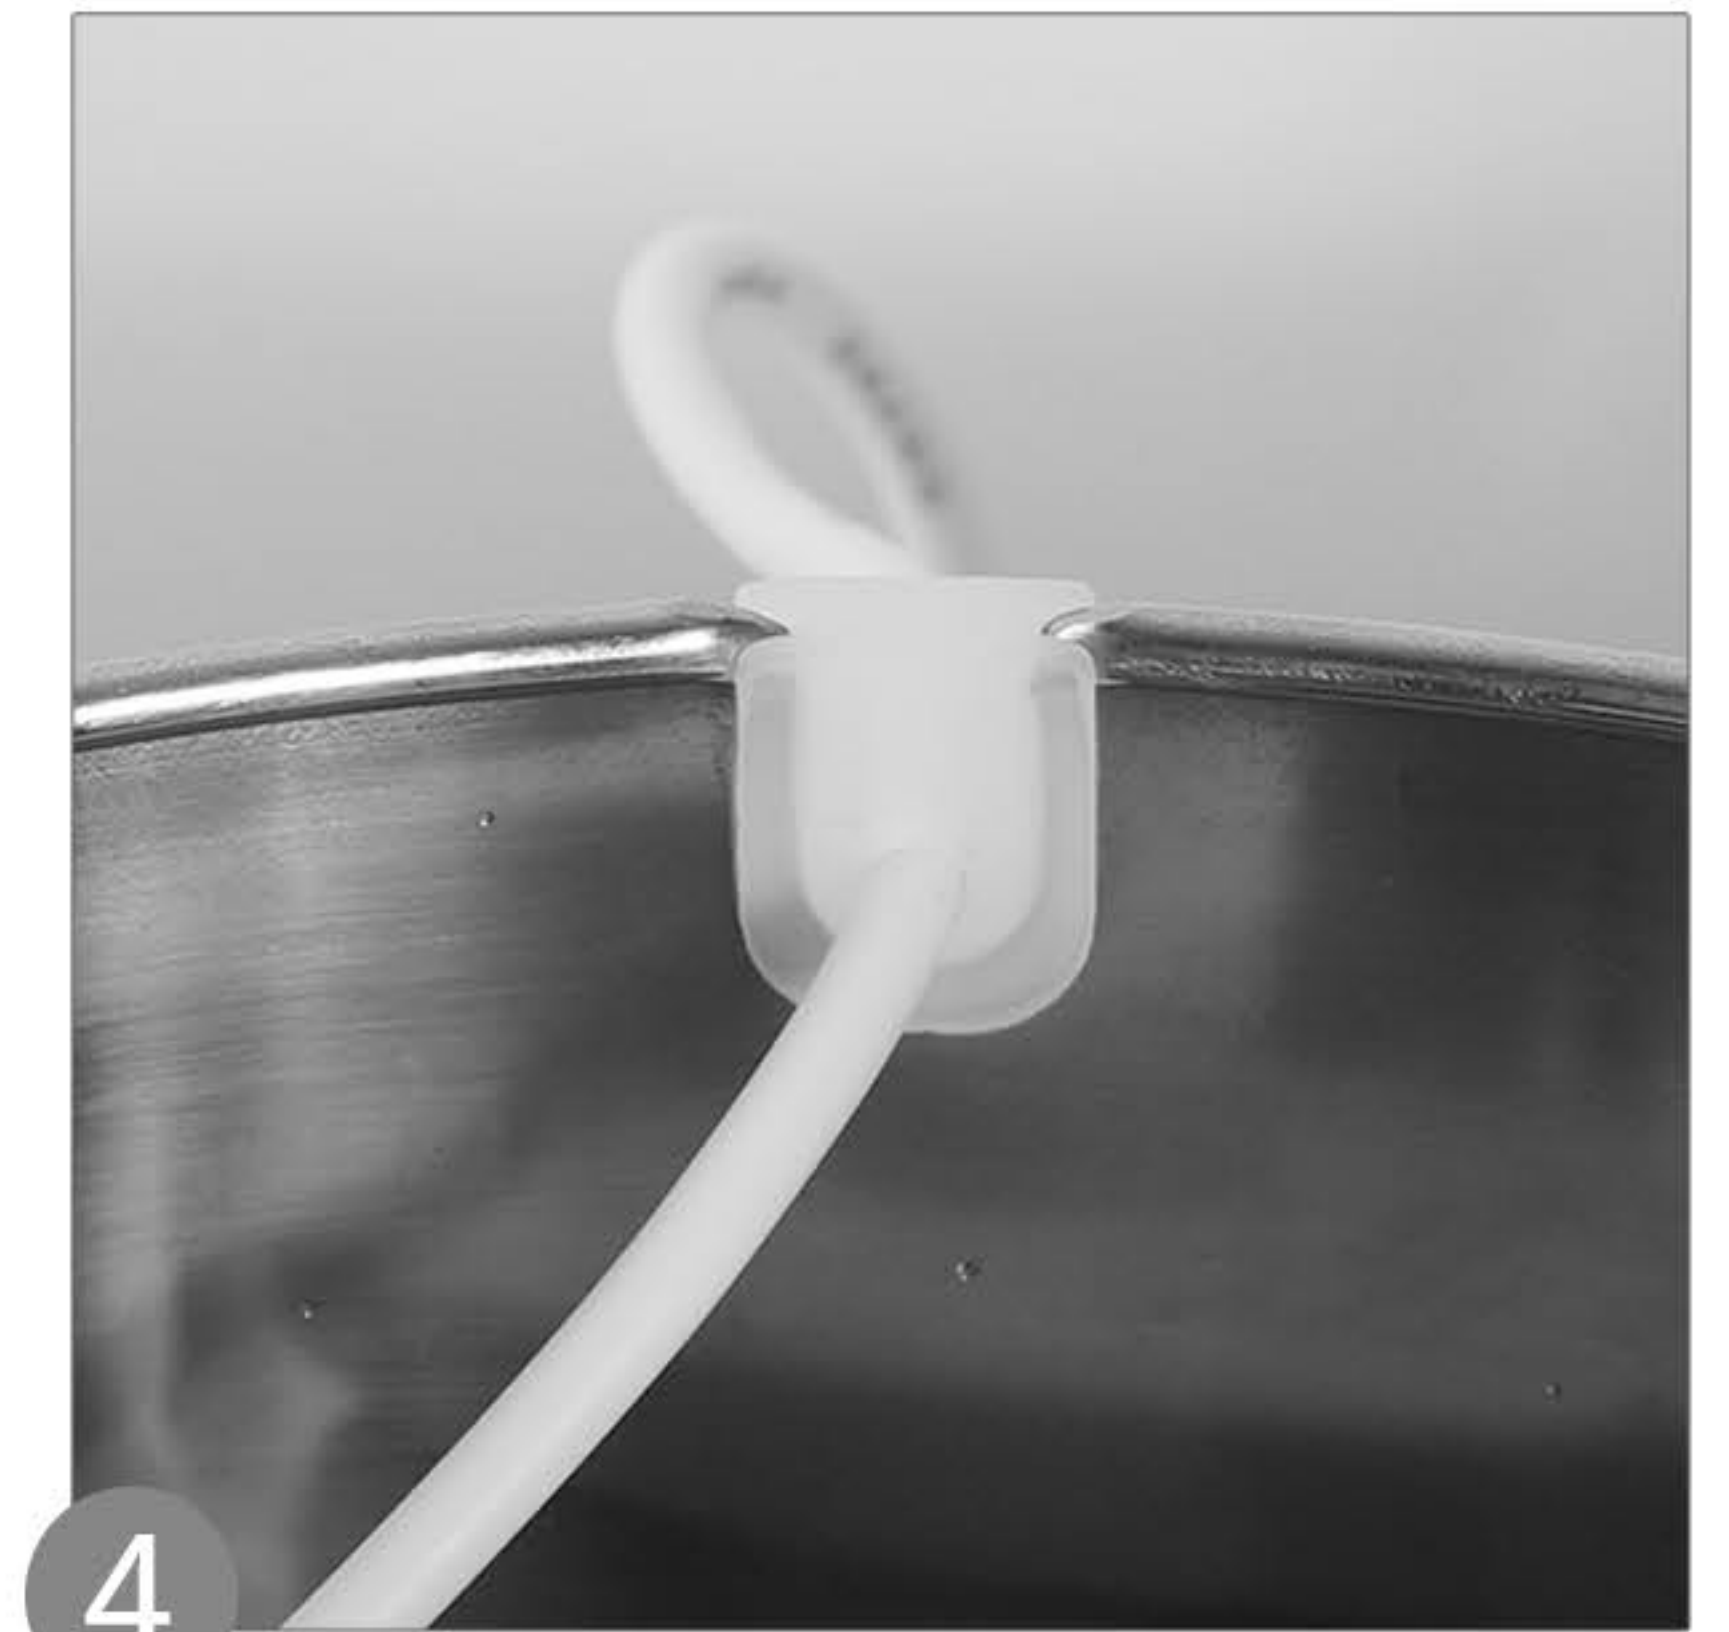

1 Put on the filter cotton

2 Install the water pump in the groove of the water tank

3 Plug in the connecting tube

4 Silica gel wire clamp is aligned with the arc mouth

5 Align the nozzle in the middle of the filter shield

6 Put activated carbon filter in turn

7 Put on the water tray

8 Tighten the sprinkler

## 04. Disassembly and Cleaning

---
